AREAS OF EXPERTISE

Construction Project Management

- Full-cycle project execution (planning, coordination, and supervision).
- Managed residential projects (villas, palaces) with budgets exceeding \$5M+.
- Ensured compliance with design specifications, timelines, and safety standards.

Structural Implementation & Quality Control

- Hands-on experience in concrete works, masonry, and finishing.
- Conducted quality inspections for materials and workmanship.
- Resolved on-site technical issues with cost-effective solutions.

Team Leadership & Collaboration

- Supervised teams of 20+ workers and subcontractors.
- Coordinated with architects, consultants, and clients to align project goals.
- Trained junior engineers and site staff.

Software & Technical Proficiency

- AutoCAD: Drafting and design review.
- SAP: Basic structural analysis.
- MS Office (Excel, Word, PowerPoint): Reporting, documentation, and presentations.

Time & Cost Optimization

- Reduced project delays by 15% through efficient scheduling.
- Minimized material waste by implementing inventory tracking systems.

Health & Safety Compliance

- Enforced OSHA and local safety regulations on-site.
- Maintained zero major accidents across 250+ villas completed.
