CONSULENZABIM
SOLUTIONS

Comprehensive BIM Services

BIM Model Creation

Accurate and detailed BIM models for all project phases.

Design Review & Audits

Thorough reviews to ensure design quality and compliance.

Onsite Deployment

Expert BIM resources deployed directly to your project site.

We offer complete BIM services, from model creation to implementation assistance. Our team excels in preparing BIM models, design reviews, and quantity extraction.

Key Areas of Expertise

BIM Management

- Strategic BIM implementation
- Project coordination and Management

MEP Projects

- MEP BIM modeling
- Clash detection

Virtual Construction

- VDC services
- Digital twin creation

Our specialties include BIM management, MEP projects, and virtual construction. We also excel in digital twin creation and quantity surveying.

Key Takeaways

BIM Adoption

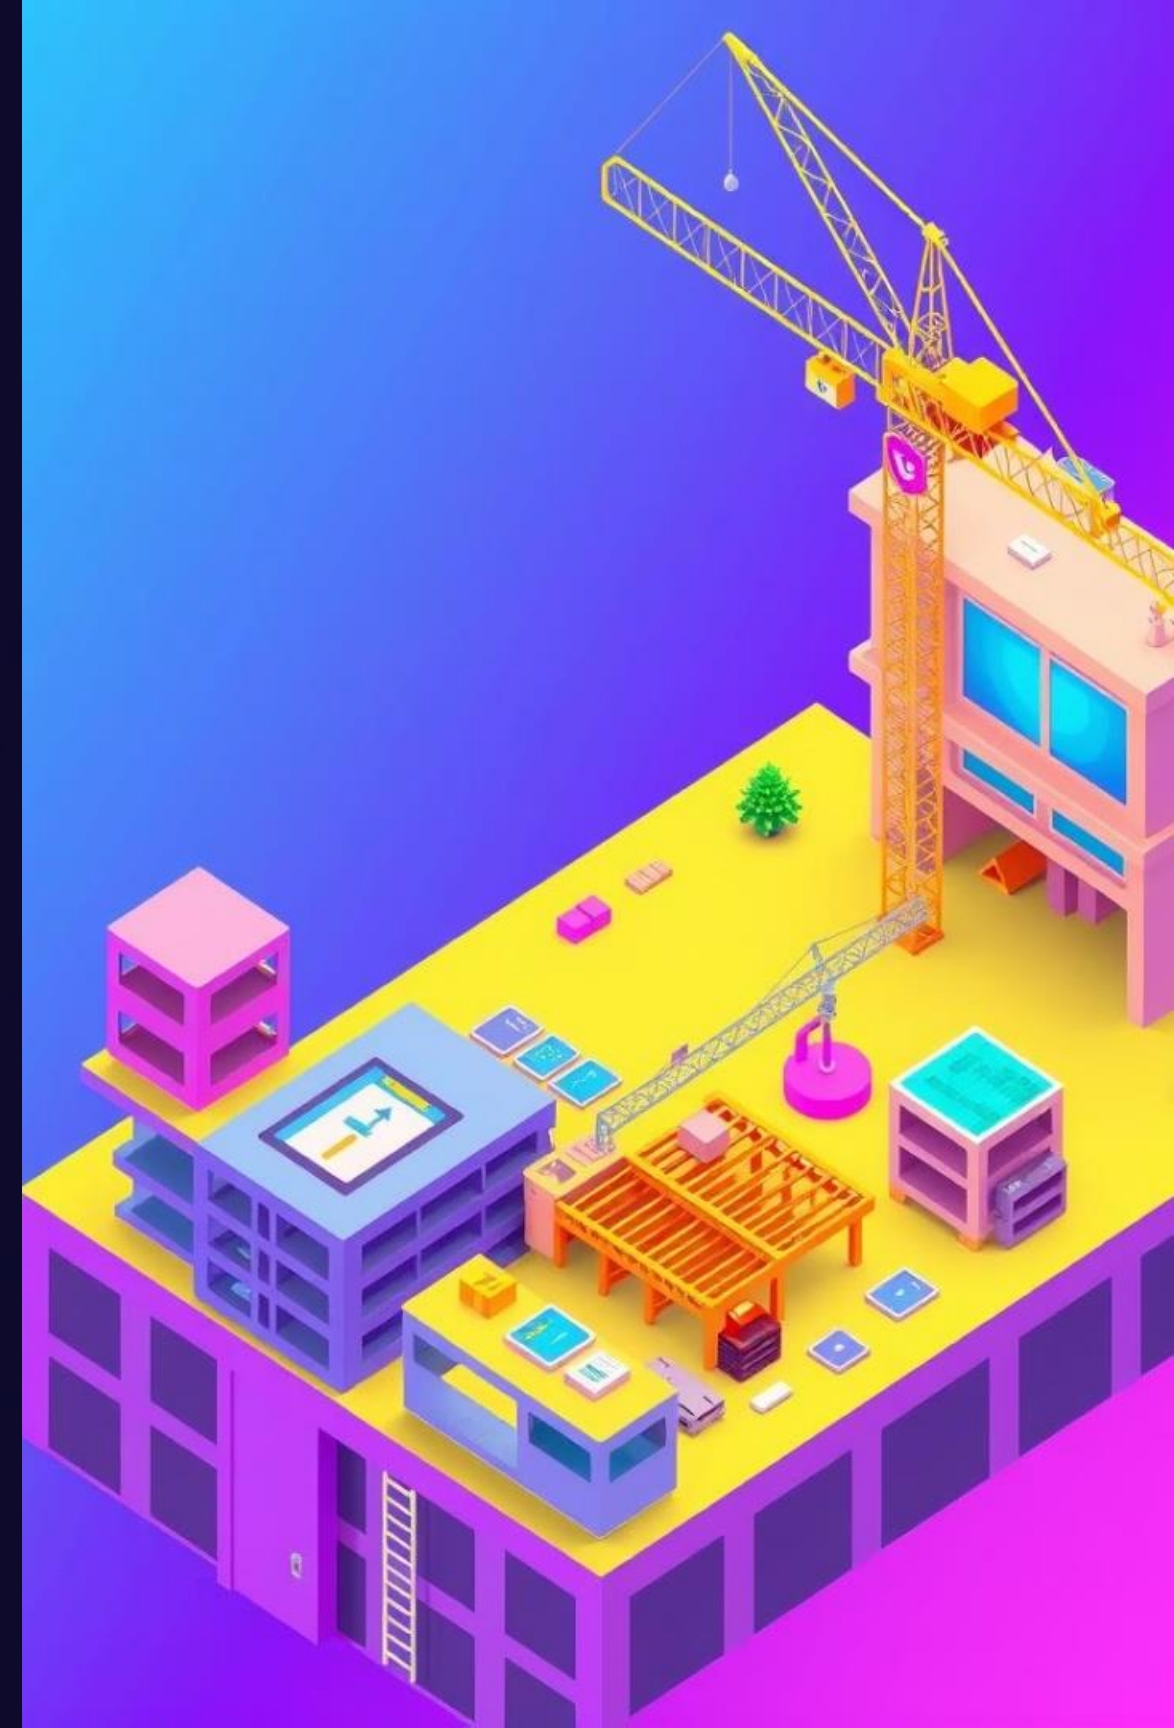

Embrace BIM for enhanced construction processes.

Strategic Solutions

Optimize your projects with expert consulting.

PMO Efficiency

Implement robust project management controls.

Our Core Strengths

BIM Expertise

360° BIM modeling services and interdisciplinary coordination.

Customized BIM dashboards tailored to your project needs.

Streaming your Business

Real-time construction sequencing and simulation.

Point cloud to BIM conversion for existing structures.

Worksharing for Enhanced Performance

1

Outsourcing Services

High-performance worksharing solutions.

2

International Expertise

Better bottom lines for global clients.

3

Vast Experience

Thousands of man-months of project experience.

Our worksharing services deliver superior performance and improved financials. Leverage our international experience for your projects.
