#### PERSONAL INFORMATIO

Nationality: Egyptian

Date of birth: 12th August 1997

Marital Status: Single Military Status: Exempted

#### **EDUCATION**

# Benha University - Shoubra faculty of engineering

- Major: B.Sc. in Mechanical Power Engineering
- Graduated: May 2020 with grade Good
- Graduation project: Cool thermal energy storage (using finned tubes).
- Graduation project grade: Excellent

# PROFESSIONAL EXPERIENCE

# **RAKA DESIGN**

(Heliopolis, Egypt) Aug 2024 – Present

#### FIREFIGHTING & PLUMBING DESIGN ENGINEER

- Design FIREFIGHTING & PLUMBING systems for various Health care, residential, and industrial projects.
- Develop detailed design plans, specifications, and drawings for Firefighting & Plumbing systems.
- Perform suitable system selection and requirements for firefighting according to NFPA and Local Codes.
- Conduct hydraulic calculations to determine system Head and Flowrate requirements.
- Collaborate with architects, electrical engineers, and other stakeholders to ensure integrated and efficient design solutions.
- Conduct entirely systems calculations to determine water, fire tank size, and pump specifications requirements.
- Prepare accurate cost estimates for materials, labor, and equipment associated.

# MENTOR Consulting Group, MCG

(Giza, Egypt)

#### FIREFIGHTING & PLUMBING DESIGN ENGINEER

May 2024 - Aug 2024

- Design FIREFIGHTING & PLUMBING systems for various Health care, residential, and industrial projects.
- Develop detailed design plans, specifications, and drawings for Firefighting & Plumbing systems.
- Perform suitable system selection and requirements for firefighting according to NFPA and Local Codes.
- Conduct hydraulic calculations to determine system Head and Flowrate requirements.
- Collaborate with architects, electrical engineers, and other stakeholders to ensure integrated and efficient design solutions.
- Conduct entirely systems calculations to determine water, fire tank size, and pump specifications requirements.
- Prepare accurate cost estimates for materials, labor, and equipment associated.

## **CEGMAN Consulting Group**

(Giza, Egypt)

## FIREFIGHTING & PLUMBING DESIGN ENGINEER

Nov 2023 - May 2024

- Design FIREFIGHTING & PLUMBING systems for various Health care, residential, and industrial projects.
- Develop detailed design plans, specifications, and drawings for Firefighting & Plumbing systems.
- Perform suitable system selection and requirements for firefighting according to NFPA and Local Codes.
- Conduct hydraulic calculations to determine system Head and Flowrate requirements.
- Collaborate with architects, electrical engineers, and other stakeholders to ensure integrated and efficient design solutions.
- Conduct site visits and surveys to assess existing infrastructure and gather necessary information for design purposes.
- Prepare accurate cost estimates for materials, labor, and equipment associated with design.
- Review contractor proposals, select suitable vendors, and recommend equipment for installation.
- Monitor the construction progress on-site to ensure compliance with the approved design and technical specifications.
- Conduct quality control inspections and commissioning activities to ensure systems are functioning properly.

#### Some Projects:

Mostakbal Misr Project.

(Dabaa axis, Egypt)

- o Firefighting system (for main buildings and layout)
- o Water supply system (for main buildings and layout)
- Drainage system (for main buildings and layout)
- o Industrial sewage network

Nafisa El Hosary University Hospital.

(Al Fayoum, Egypt)

- Water supply system
- Drainage system
- Damietta Traffic Department

(Damietta, Egypt)

- Firefighting system (for main buildings and layout)
- Water supply system (for main buildings and layout)
- O Drainage system (for main buildings and layout)

# Heliopolis co. for chemical industries, (81th Military factory)

(Cairo, Egypt)

#### MAINTENANCE ENGINEER

Oct 2021 - Oct 2023

- Maintaining the physical condition of equipment by performing routine inspections and repairs.
- Repairing or replacing defective components.
- Installing new machinery or equipment.
- Monitoring machinery operation to ensure that it is working properly

#### **COURSES & TRAINING**

- BIM SOLUTION (Mechanical BIM Engineer)
  - BIM Workflow and implementation
- Engineers house (HVAC, Firefighting and plumbing systems Design)
  - This course was about how to design different heating, ventilation, and cooling, firefighting, water supply and drainage systems by using different programs (AutoCAD, Revit, HAP and Elite).
- Toushiba Elaraby trainee, Qalyubia, Egypt

(July2019- August 2019)

- This training was about Production lines and how to operate them.
- New and renewable energy authority(NREA)trainee, Cairo, Egypt

(August 2018 – September 2018)

- This training was about the new and renewable energy generation in different methods.
- Cairo Electricity Production trainee, Cairo, Egypt

(August 2017 – September 2017)

- This training was about (Rankine cycle) and the whole operations of the station and Its components in true site and its modification to get maximum power.
- Egyptian railways maintenance & services trainee, Cairo, Egypt

(July 2017 – August 2017)

This training was about the idea of the work and maintenance of the different parts
Of the trains.

# SOFTWARE SKILLS

- Revit MEP.
- AutoCAD
- Solid works.
- Elite
- Microsoft office
- Duct sizer

# PERSONAL SKILLS

- Ability to work both independently and as part of a team.
- Punctual and able to meet deadlines.
- Excellent oral and written communication skills.
- Hard working person
- Self-learning

# Linguistics skills

- Arabic
- English
