facebook.com/Hassan Badein

A graduate of building Engineering from An-Najah National University, I am a meticulous and quick learner, interested in continuous improvement of the front end through the skills I gained from my university major. During my university journey, I gained a lot of skills and experience. I have a good background in structural, architectural, environmental, electrical and plumbing design of buildings, engineering management, quantity surveying, engineering supervision and PMP. My personality improved during my university life, I tend to be enthusiastic, quick learner and a sociable person with good communication and leadership skills.
