LIGHTING

COMPANY PROFILE

LIGHTING DIVISION

AL SANAD

We believe light can have more influence
over your interior design than
any other single element.

LIGHTING DIVISION

Lighting products are not purely functional items.

They can be considered pieces of furniture, just like any chair or table, and their appearance contributes greatly to the overall look and feel of a room. That is not to say they should always be objects of contemplation in their own right. Sometimes, their contribution to the interior design of a room will almost be totally unconscious. Hardly anyone will ever look at them closely or scrutinise their appearance. Nevertheless, their qualities will lodge themselves in the minds of everyone who comes into that space. We sometimes take light for granted, but it does more than anything else to create the atmosphere of a place it determines how we see other things. Your choice of lighting products has a big effect on that.

Commitments to provide highly detailed advice as you design your project, is our priority, then following up with talented & experienced onsite support as your premises taking shape.

From the geometrically simple to an entire customized solution, we are able to incorporate any of our products into your project. From every day contemporary office lighting to high end architectural lighting. Quality, detail and an interesting mix of materials are integral to each brand's designs. These are created by using the best quality raw materials to their upmost capability, paying great attention to the concept and form.

Believing in reputation for service and value for money is second to none for us. Through the focusing of our resources, our goal is to establish new standards of sales and technical support to our customers, in addition to service levels that will set new standards within the industry.

Lighting design

Our experienced design team can produce a highly detailed and accurate picture of exactly how a given product will perform when placed into your building design. It is here that we can explore product options, placement ideas and configuration types to ensure your project is perfectly light.

Product Selection

Our large product range and excellent technical understanding means that we can make a range of recommendations for products that will exactly fit your brief. From the seemingly minor to the absolutely major lighting elements, we will balance performance, look and cost to bring you a perfect product selection. We can also place sample products in your hands so that there are no surprises when it comes to construction and fitting.

Project Management

We pride ourselves in fitting in perfectly with your multi-disciplinary team. Architects, operations and trades can all rely on our 10 years of experience to make sure that our lighting project management will working perfectly with all those involved. We will assign a dedicated project manager to ensure that the project performs at planned.

Delivery

We understand the importance of timely delivery. Our experienced operations team will ensure, that your products would have been booked for production and will be delivered in one piece and on time. Our operation team will do their maximum to ensure smooth delivery and sometimes will perform minor miracles to help you in case you are up against time.
