INTRODUCTION TO TTE PRODUCTS & SOLUTIONS

TTE Products & Solutions specializes in the supply and distribution of a wide range of HVAC and Refrigeration products and accessories, Variable Frequency Drives (VFDs), Pumps, Advanced Metering Solutions, Copper Coils, PI Ducts, Compressors, and more. Additionally, the company operates an Elevators and Escalators vertical, collaborating with global brands to provide engineering, supply, installation, and maintenance services.

Prominent projects include their involvement in the world's largest Dubai Waste-to-Energy project, where the team played a crucial role in the Design, Supply, Testing & Commissioning of VRF Units, DX Units, FAHUs, and Package Units. Other noteworthy projects include the Greenfield Liquid Terminal, Wild Wadi, Address Downtown Hotel Dubai, GEMS Academy, Elevator installations at Peru Pavilion, Sharjah Sustainable City, Car Stackers at Mercedes Benz showroom, and numerous others.

From multi-storeyed commercial and residential buildings, hospitals, hotels, shopping malls, banks, universities, schools to fuel stations, district cooling plants, electric substations and server rooms, TTE's sustainable engineering solutions have ensured maximum efficiency and cost effectiveness with a low carbon footprint.

TTE's team of qualified engineers and technical experts are fully trained and stay updated with internationally accepted industry standards, at every step of project execution.

At TTE Products and Solutions, we focus on core engineering and customization to provide the most feasible and optimum solutions to our clients/end users. We have a team of well-experienced engineers to take care of the design and selection aspects for the following verticals-

HVAC: We propose complete solutions with VRF and DX system (Toshiba, Hitachi and Hisense), Copper coils and fittings (Cambridge Lee and Etihad) Pipe Support and Hangers, Vibration Isolators (TAV SSS and Tembo) and Adhesives and Coatings (Bostik).

Refrigeration: We design cold rooms and offer solutions for service industries, hypermarkets, and logistics centers with our brands like Dorin, Alfa Luvé and HC.

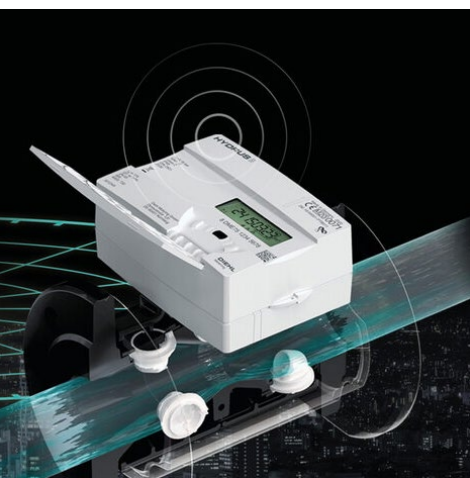

Metering: We represent ultrasonic metering solutions for Water and LPG segments with brands like Diehl Metering and Flonidan.

Variable Frequency Drives: We are solution providers to HVAC, Water and wastewater segments, DCP's, Desalinations plants, Oil and Gas, Industrial segments with Danfoss VLT, VACON and iC series.

Elevators: We have a team of engineers to design, customize, and refurbish elevators and offer car lifts, stackers, and more, The brands we offer are Fuji, EP, IMEM, Ecospace, Metatrone and Mutrade etc.

Pumps: We provide pumps and motors for residential, commercial, and industrial use from leading brands like Grundfoss, Saer, Homa and LEO.

Our after-sales services include field visits, installation support, and commissioning to ensure seamless operation. Additionally, our TTE Facilities Management division offers AMCs to support your engineering needs.

OUR KEY STRENGTHS

- A variety of products aimed at meeting the transportation requirements of all kinds of buildings.
- Lifts with luxury, comfort and ease of operation, suited for indoor and outdoor
- Conforming to European standards, our elevators, escalators and services follow stringent quality control.

Danfoss Drives is a global leader in AC/DC and DC/DC power conversion, as well as variable speed control for electric motors. With the world's largest portfolio of power converters, VLT® drives, and VACON® drives at your fingertips and backing from a partner whose legacy has been built on decades of passion and experience.

At Danfoss Drives, you can find electric and energy efficient solutions to help decarbonize any industry. Improve productivity and reduce CO2 footprint in HVAC, water treatment, energy, marine and offshore, mining and minerals, food and beverage, heavy industries, and more.

We're using intelligent, electrified and energy-efficient solutions to help build a better future. Where people can live in sustainable cities without compromising on comfort. Where we can help minimize the impact of a growing global population, urbanization and climate change by enabling our customers to optimize food production and electrified transportation via the power of renewable energy. And as our needs continue to grow, we'll continue pushing ourselves to better serve you while staying at the forefront of sustainable innovation

SERVICE & SUPPORT

- TTE is an authorized Danfoss Controls Partner.
- Factory certified engineers and technicians.
- Well-equipped service center with centralized 24/7 toll free system.
- Ample spare parts maintained in stock to ensure prompt support.
- TTE takes care of AMC, PM of VFD panels to improve the lifetime of systems.

DRIVEPRO® SERVICE PARTNER

As an official DrivePro® Service Partner, we deliver DrivePro® Life Cycle services in the UAE. This enables us to offer our clients access to Danfoss' industry-leading variable speed drives, ensuring optimal efficiency and control for their applications.

SMART WATER METERING SOLUTIONS

Diehl Metering is a worldwide leader in the design, manufacture, and supply of smart metering solutions. With over 150 years of experience, they empower utilities, municipalities, and industries to take control of their infrastructures, bringing greater efficiency, sustainability, and responsibility to the way they manage water and energy. Their ultrasonic water meter is designed for all applications of domestic cold-water supply and in heating/cooling applications enabling accurate measuring with long-term stability under difficult conditions (no measurement of air and insensitive to sedimentation) and for billing purposes respectively.

IZAR CENTER

SMART GAS METERING SOLUTIONS

Flonidan stands out as a frontrunner in the world of cutting-edge ultrasonic gas metering solutions. Their focus on innovation allows customers to optimize energy use, cut costs, and promote sustainability. It is intended for energy measurement in residential sites where gas is the energy source. Their bus converter is a low-cost, plug-and-play device for converting data from wireless M-Bus to wired M-Bus. The converter handles a variety of different wireless M-Bus protocols (mode T1/T2 and C1) in the ISM band (868 MHz) and is used for data communication from both for water, heat, cooling, gas, and electricity meters.

Bostik is a leading global adhesive specialist in industrial manufacturing, construction, and consumer markets. As part of Bostik, the Idenden brand of specialist heating, ventilation and air conditioning products continues to offer a comprehensive range of technologically advanced adhesives, coatings, and sealants.

We contribute to a more sustainable world by offering low-VOC, high-performance products. With accreditation to all recognized quality standards such as UL, EN ISO 9001 and ISO 14001, customers can be assured that Bostik products are fit for purpose and meet or exceed standards set by HVAC and other regulatory organizations.

QUALITY POLICY & CERTIFICATIONS

TTE aims to consistently deliver professional and efficient solutions and services. The dedication to provide high-quality products and services necessitates the use of a formal Quality Management Organizational Structure. This ensures that the minimum standards of performance are met to satisfy the needs and expectations of our clients in terms of quality, timeliness, cost-effectiveness, and efficiency. .

IMS POLICY

TTE strives to deliver high level customer satisfaction by ensuring Quality, Health, Safety & Environment (QHSE) management in all aspects of activities undertaken.

ISO CERTIFICATION

TTE's ISO certification demonstrates its conformity to the requirements of the latest quality process standards set by the International Organization of Standardization.

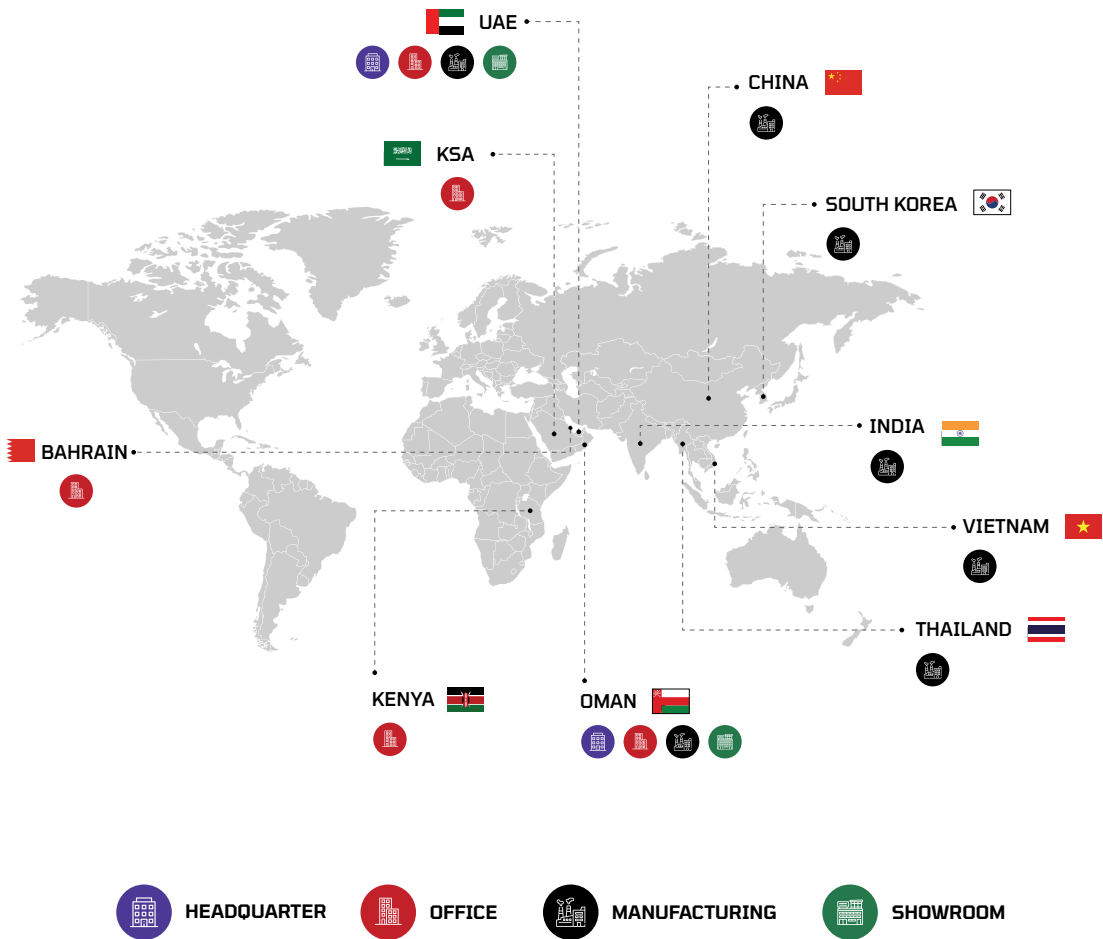

TTE has two top-notch warehousing facilities in the UAE and one in the Riyadh, the Kingdom of Saudi Arabia. These facilities are well equipped and maintained to meet all the storage and distribution requirements of the company and its various business verticals. The working of these facilities is based on efficient and strong infrastructure that ensures the safe and secure storage and management of all our products at all times.

The loading and un-loading docks are equipped with latest technology ensuring quick and easy management of goods and materials. These state-of-the-art facilities have been designed to the nature of our business, and has the capacity to accommodate large to heavy duty goods. All of them, with no exception, follow stringent inventory processes, that helps keep track of all the brands/goods we house and distribute.

We have a team of efficient and dedicated personnel who closely manage the in-flow and out-flow of goods at all times, with assurance to efficiently meet the demand and supply needs of various departments.

TTE is an authorized and exclusive Danfoss Controls partner. TTE Products & Solutions distributes a wide range of Danfoss Controls, VFDs and Automation products in the UAE, Dubai and Northern Emirates. Along with providing access to this exclusive range, TTE also has a Danfoss certified After Sales Service Centre. Located in Jebel Ali, Dubai, the centre houses factory certified engineers and skilled technicians. This is a well-equipped facility that manages AMC, PM and VFD panels, its upkeep and repair works and retrofitting.
